

## Technical Data Sheet

# ENVIRONMENTAL WASH

## Blanket and Roller wash

Environmental Wash is a premium one step Blanket and Roller Wash with controlled drying speed designed for use on small and large sheet fed and web offset presses, with minimum environmental impact.

High solvency is activated by adding up to 15% water for thorough cleaning of ink and paper residues from printing surfaces.

### **FEATURE BENEFITS**

- **ENVIRONMENTAL Wash is biodegradable and free from aromatic hydrocarbons, chlorinates, glycol ethers and terpenes (eg. dLimonene).**
- **Low odour formula combines with water to form Step 1 of the 2-step roller wash system. Use straight from the tin as the second, flushing step.**
- **Anti corrosion additives protect the press as detergents and solvents strip glaze, paper lint, sizing and coating residue from blanket and roller surfaces.**
- **Available in 20-litre and 200-litre drums.**
- **Consult Safety Data Sheet for further information.**

### ***Directions;***

**Apply by hand to the blankets and rollers using the wash-up attachment.  
May be activated with up to 25% water.**
